## **DETAILED ACTION**

## Election/Restrictions

- 1. Applicant's election of Group I directed to claims 59-87 and 96-251 in the reply filed on December 03, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). The traversal is a traversal in name only and is made on the ground(s) that there is no substantial burden on the Office because the "the claims of the present application would have to be searched in a handful of subclasses" and that "since electronic search is commonly performed, a search may be made of a large number of, or theoretically all, subclasses without substantial additional effort."
- 2. The restriction requirement was based on the substantive matter of a material limitation found in Group II, but not in Group I. Group II contains the essential limitation of a neutron shielding element, a technical feature required to carry out the shielding of the external environment from the harmful byproducts of nuclear decay. The examiner set forth that Group I and Group II were related as subcombinations usable together and provided an appropriate example as required in MPEP 806.05(d) in the previous Office action.
- 3. The response fails to traverse the position adopted by examiner regarding the material distinction between Group I and Group II and the related position on why the two groups are distinct, and therefore does not satisfy the requirements of MPEP 818.03(a) such that the reply may be considered a traversal.

4. The applicant has not supplied an argument, supported by facts, that the other use, suggested by the examiner, cannot be accomplished or is not reasonable.

- 5. The traversal a traversal in name only, and is not persuasive.
- 6. Claims 88-95 are therefore withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on December 03, 2004.
- 7. The following restriction requirement is applied to claims 59-87 and 96-251
- 8. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, for example, claim(s) 59-87 and 106-117, drawn to a container.

Group II, for example, claim(s) 96-105, drawn to a billet.

Group III, for example, claim(s) 118-119, drawn to a container manufacturing apparatus.

Group IV, for example, claim(s) 120-251, drawn to a container manufacturing method.

9. The inventions listed as Groups I, II, III, and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The groups do not all share, at least and/or for example, the special technical feature corresponding to the method step of pushing a boring bunch into a metal billet and bending a plane on a billet towards an inner wall.

Art Unit: 2881

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Vanore whose telephone number is (571) 272-2483. The examiner can normally be reached on M-F 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R. Lee can be reached on (571) 272-2477. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
